Email: pankajpriney@gmail.com

Professional Summary

Senior Full Stack Engineer with 9+ years of experience **designing and building scalable end 2 end web app, REST APIs, distributed applications, and AI-powered platforms** using **Node.js, TypeScript, Laravel PHP, React, Angular, Express.js, PostgreSQL, Supabase, Redis, Docker, and AWS**. Experienced in **LLM Integration, OpenRouter, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Databases (pgvector), Semantic Search, Microservices, Event Driven Architecture, Serverless Computing (AWS Lambda), Asynchronous Programming and end-to-end product development**. Passionate about building **scalable backend architecture and AI-driven** software solutions.

Skills

Backend & Distributed Systems: Node.js (Express.js), PHP (Laravel, CodeIgniter), Python (Basic), Microservices Architecture, Distributed Systems, Event-Driven Architecture, Asynchronous Programming, API Security, Authentication (JWT/OAuth), OWASP Security Best Practices, System Design, Object-Oriented Programming (OOPs), Payment Gateways (Stripe, PayPal), Backend-for-Frontend (BFF), SOLID Principles.

Frontend Development: Angular (v8-16, v20-22), React JS(v19), TypeScript, JavaScript, HTML5, CSS3.

Messaging & Streaming: Apache KAFKA (Producers, Consumers, Topics), BullMQ, RabbitMQ.

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, Query Optimization, Schema Design, Database Modeling, Eloquent ORM

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Docker Compose, CI/CD Pipelines, GitHub Actions, Gitlab, Serverless Computing, Git, Linux, AWS CloudWatch, PM Process Manager

Tools & AI: Cursor AI, VS Code Extensions, ChatGPT (OpenAI), Gemini, Claude, Postman, GitHub Copilot

AI/LLM Engineering & GEO: LLM Integration, LLM Orchestration, RAG Pipeline, Prompt Engineering, Context Engineering, Vector Databases (pgvector), Embeddings, Semantic Search, AI Search Visibility (GEO), Google AI Overview, Google AI Mode, Prompt/guardrail patterns

Professional Experience

FiftyFive Technologies (<https://fiftyfivetech.io/>)

Senior Software Engineer (16 July 2025 – Currently Working)

Project: [AURORA - RankingLLM](#) (AI Search Visibility / GEO Platform)

Technologies: Node.js, TypeScript, Express.js, React JS, Supabase, PostgreSQL, OpenRouter (LLM Orchestration), REST APIs, pgvector, DataForSEO, SerpAPI, Prisma

Responsibilities and Achievements:

- Built RankingLLM, an **AI Search Visibility (GEO)** platform for tracking brand visibility across **ChatGPT, Gemini, Claude, Perplexity**, and **Microsoft Copilot** using **Node.js, TypeScript, Express.js, React, Supabase, and PostgreSQL**.
- Designed **LLM-powered seed prompt generation and RAG Pipeline chatbot workflows** using **pgvector (Supabase)** for **embedding storage, semantic search, and intelligent knowledge retrieval**.
- Integrated multiple **LLM providers** through **OpenRouter API** for prompt **orchestration**, automated **intent classification**, and **AI-powered content generation**.

- Integrated third-party APIs include **SerpAPI**, **Google Search Console**, and **Google Analytics APIs**.
- Built AI-powered **onboarding** workflows integrating DataForSEO APIs for **keyword discovery**, **search volume**, **CPC**, **search intent**, **caching**, pagination, and **LLM-driven prompt generation**.
- Implemented **Google AI Overview** and **AI Mode** visibility tracking using **DataForSEO API**, **SerpAPI**, and Playwright-based scraping.
- Designed and optimized **PostgreSQL/Supabase schemas**, **indexes**, and **aggregation queries** to improve reporting performance and pagination.
- Designed and implemented **asynchronous background processing** using **BullMQ**, **CRON jobs**, and **queue-driven** workflows for automated analytics reporting and **scalable** backend processing.
- Designed and implemented **Backend-for-Frontend (BFF)** APIs to aggregate and transform data from Google Search Console, Google Analytics, and internal services into optimized responses for analytics dashboards.

Shipco-IT Pvt. Ltd. (<https://www.shipco-it.com/index.html>)

Principal Application Developer (5 July 2023 – 30 April 2025)

Project: In-house **BPO Application**

Technologies: Node.js, Angular, Laravel, MySQL, AWS S3, AWS Glacier, OCR

Responsibilities and achievements:

- Developed an enterprise **ticket** and workflow management system triggered by incoming **emails**.
- Implemented role-based access control (**RBAC**) for Admin, Manager, Head, and Executive workflows.
- Built **OCR**-based document processing pipelines for automated PDF text and image extraction.
- Integrated **AWS S3** and **Glacier** for secure document storage and lifecycle management.
- Optimized **Laravel/MySQL** backend workflows, database performance, and **REST APIs** for enterprise applications.
- Identified and resolved backend performance bottlenecks to improve API response time and application reliability.
- **Mentored junior developers** through code reviews, technical guidance, debugging support, and development best practices.

Samvardhan Motherson Health Solutions (<https://smhs.motherson.com/>)

Angular & PHP Developer (23 September 2022- 30 June 2023)

Project: In-house **eLogbook**

Technologies: Node.js, Angular, PHP, MySQL, AWS S3

Responsibilities and achievements:

- Developed and maintained a 21 CFR Part 11 compliant Electronic Logbook application for pharmaceutical manufacturing.
- Built **Angular** modules for Masters, Logs, and Reporting dashboards.
- Developed and integrated **PHP (CodeIgniter)** APIs supporting front-end-backend communication.
- Managed Git-based version control and production deployments.

Opensource Technologies (<http://www.ost.agency>)

Software Engineer (12 May 2016 - 21 September 2022)

Project: Caveday, Silvermirror, RealTalk (Rest APIs), FindBeautyPros

Technologies: Node.js, Laravel, Express.js, Codeignitor, Angular, PHP, MySQL, PostgreSQL

Responsibilities and achievements:

- Developed **Laravel** and **Node.js** based enterprise web applications.
- Built **REST APIs** using **Laravel** for **mobile** and **web** platforms.
- Developed **Node.js backend services** with **MongoDB** and **Angular** frontend applications.
- Maintained legacy **PHP** applications and migrated features to **Laravel**.
- Hands on experience with **Google Cloud Platform** with **AWS**

Education

B. Tech (Information Technology) - (69%) - 2011 - Rajasthan Technical University, Kota

Intermediate - (55%) - 2007 - R.B. Ram Roop Vidya Mandir Senior Secondary School, Delhi

Matriculation - (70%) - 2005 - R. B. Ram Roop Vidya Mandir Senior Secondary School, Delhi
